Under Cabinet Strip Lights

The ASD smart link offers a new concept in cabinet lighting. By using the SMART LINK connection we can offer the most flexible system currently marketed in Europe. Interconnection can be made either directly from one fitting to the next. Or by using an additional 2 pole connector (CON132 not included), simply by cutting the enclosed cable to length then attaching the connector.

The 2pole connector system allows quick and easy installation into a multitude of display purposes under shelves, kitchen cupboards, behind pelmets or in display cabinets. The ultra slim profile and neat dimensions allow unobtrusive discrete lighting whilst the T4 triphosphor fluorescent tube provides powerful illumination with long life. Units can be either vertically or horizontally mounted with an ultra slim 19mm depth available.

- Inter linkable fluorescent light (5 units max).
- Ultra slim design.
- Energy saving.
- Individually switched.
- 2 Pole male/female connector system.
- Provides discrete yet powerful illumination.
- Flicker free.
- Each fitting includes tube, diffuser, fixing brackets, 2Mtrs of cable and a 13amp plug.
- Designed to EN 60598-2-4. In conjunction with EN 60598-1:2000.
- Ideal for under shelves, kitchen cupboards, display cabinets.

LL/WD206	6W	270mm x 19mm x 42mm LxWxD
LL/WD412	12W	424mm x 19mm x 42mm LxWxD
LL/WD516	16W	524mm x 19mm x 42mm LxWxD
LL/WD620	20W	630mm x 19mm x 42mm LxWxD
LL/WD624	24W	690mm x 19mm x 42mm LxWxD
