- 2.Change the SSID name of controller

★ Learning (combining)

1. Long press the learning key of SR-1009FA until the LED lighting flash to deleted pervious learning memory. This is to avoid the previous learning misleads the operation.

2. Leading by EASYLIGHTING application:

There are two learning way:

First way:

- 1) Selected any one room and there will be small mark on the upper right side.
- 2) Press **room button** .
- 3) Press learning key  on RF controllers SR-1009xx series
- 4) Touch the color wheel, LED lighting will blink to confirm room designation

Delete

Press at learning key  on receiver (SR-1009Fxx) over 5 seconds until LED light flash, then delete the learned ID.

Second way:

- 1) Enter setting interface and select  **Learn room information**.
- 2) Press learning key of 1009xx, then touch **Learning**  on the application, and touch zone (for example ) after that.

The LED lighting will flash once means successful paired.

3. Learning by the remote.

If there is a remote which can works with RF controller SR1009XX. We can also use remote doing the learning operation.

The "EASYLIGHTING" mobile phone operating system will follow the zones which remote paired. For example, if we learn the controller to zone 2 by the remote, then we can use cell phone control zone 2 directly without any learning operation.

Manual

a. Room button (P27, P28)

e. RGB/CDW brightness level line (P21)

This button exist in RGB/CDW interface, they are similar, so here will take RGB as an example to explain.

- 1) Short press the button .
- 2) Brightness level can be adjusted from 0-255 to an accurate color.

Attention

Before adjust the color by color line, LED might in already in an existing color, so we need zero clearing each channel first: moving each channel in any level between 1-225, then move it back to zero, then RGB lighting will off which means zero clearing successfully.

f. W button (P22)

This button only exists in RGB channels color wheel interface to adjust W channel brightness independently.

Long press W button  to ON/OFF W channel independently. In RGB color wheel interface, it only adjusts R, G and B three channels brightness, and cannot adjust W channel. We need use W button  to adjust W channel brightness independently.

g. Brightness button (P23)

Brightness button exist in RGB, CDW and CCT color wheel interface.

In CDW and CCT color wheel interface, it adjusts all channels brightness.
