

G9 Non-Dimmable LED Bulbs 2.5W = 20W Forum Lighting

Product Code: INL-2857*
Stock Qty:

Product Description

G9 Non-Dimmable LED bulbs that are available in warm white or cool white. With a low energy consumption of only 2.5 watts they offer a low energy alternative to a 20 watt halogen.

G9 LED bulbs are used in various types of light fittings including wall and ceiling lights.

A warm white colour temperature provides a more homely style of light compared to cool white which is whiter and clearer. Used in certain room types cool white G9 LEDs can provide a modern and brighter lighting effect but used incorrectly in can make a room appear cold and harsh. Cool white is better used in rooms with cream or white decor to compliment a more modern feel. Cool white G9 LED bulbs are quite rare especially ones at a reasonable price.

The compact size of G9 capsule LEDs have made them a popular choice in many light fittings such as pendant lights and wall lights. They have a wide beam spread of 270 degrees which is less focused than a GU10 type lamp. Operating on mains voltage they don't require an additional transformer which has also increased their popularity.

With a long lasting 20,000 hour life expectancy G9 LED light bulbs outlast halogens by around 20 times meaning don't have to keep replacing them.

Key Features

- Colour temperatures: Warm white 3000K and Cool white 4000K
- Cap type: G9
- Wattage: 2.5 watt / comparable to a 20 watt halogen
- Beam angle: 270 degrees
- Lumen Output: 180lm
- Dimmable: Non-Dimmable
- Lifetime: 20,000 hours
- Manufacturer: Forum Lighting
- Guarantee: 3 years
