

Varilight Power Grid Dimmer Module V-Com White 180W

Product Code: GKP180W
Stock Qty: 0

Product Description

Varilight Power Grid dimmer module that can be used to dim larger amounts LED downlights and dimmable GU10 LEDs than V-Pro. Varilight V-Com module is suitable for dimming 180W of LED without needing to be de-rated like other conventional dimmer switches. This version is supplied with a mounting kit for use with Varilight PowerGrid.

Key Features

- 1 way or 2 way operation. Allows dimming from 1 side of the room and switching from another. If 2 way dimming is required then see the Varilight Eclique 2 range which utilises a master and slave touch dimmer.
- Control knob has push on / off function.
- With soft start and automatic overload protection.
- Contains leading edge V-Com dimming technology..
- Slight buzz from leading edge, not as silent as trailing edge.
- Dimming module only used for retrofitting onto existing dimmer switches that don't dim higher loads of LEDs effectively.
- Also available in a standard plate switch format, see KQP221W
- Wattage: 180W rated for LED usage, no need to de-rate.
- Product code: GKP180W
- Manufacturer: Varilight
- Guarantee: 10 Years
