

Stainless Steel 0.5W LED Marker Light

Product Code: MA23**
Stock Qty:

Product Description

High quality miniature 0.5W LED marker light constructed from grade 316 stainless steel. Fully water resistant and rated at IP68 this LED light can be used internally or externally and can even be submersed under water.

Suitable for use as internal or external LED marker lights, miniature LED ground lights, decking lights or can be used as wall lights for low level lighting.

The smaller 23mm diameter provides a discrete looking lighting option. Available in warm white 3000K or cool white 4000K colour temperatures, or an RGB colour changing version from the related products.

Pre-wired with 1.1 metres of input cable, they have a light output of 100 lumens from a premium grade Cree LED chip.

Key Features

- Input: 12V DC constant voltage
- Wattage: 0.5W
- LED Chip: Cree
- Lumens: 100lm
- IP Rating: IP68 fully water and dust resistant
