

Aurora Lighting GU10 Pressed Steel Adjustable Downlights

Product Code: EN-DLM212*
Stock Qty:

Product Description

Aurora Enlite pressed steel entry level GU10 adjustable downlights that are available in white, polished chrome and satin nickel finishes. With a GU10 cap, they operate on mains voltage and require additional GU10 LED bulbs.

Pressed steel downlights offer a cost effective downlighting solution and are ideal for price sensitive projects. But the lightweight construction isn't as durable as die cast and they have no fire rating.

Key Features
